Trolls caught conspiring to fake pm's, hack accounts, harass, and hound people.

Much has been in news recently concerning Internet trolls and a "dossier" that the police are currently dealing with. However, I've come into possession of a raw data file from which the attached is an edited extraction. I can personally verify that everything in the extraction is perfectly authentic. What it shows is really quite THE most disgusting evidence of trolling i have seen from the people who claim the moral high ground. In it you will see names familiar to you all and it proves the following.

1. A conspiracy to cause another member of this forum real life distress and hardship.
2. An admission of faking profiles to "implicate", i.e incriminate other members. This alone brings the dossier that this group are responsible for collating into doubt as to its veracity.
3. An insane resolve to cause as much trouble as possible for anyone disagreeing with them, and the file ends with a threat of physical violence that must be disturbing to all.

To my certain knowledge, none of the targets of these lunatics has ever done anything to deserve their "attention" For the avoidance of doubt, the "Pam" referred to is Pamela Gurney and the "Robert" is Robert Guest. Others involved are Sorcha MacPharlain, Kate Holt and Gwen James. There may well be others but they are not identifiable by name or at least were not involved in this particular action.

It is also known that this group are responsible for attempting (and failing) to have another member dismissed from their job. Remember, these are the people so vociferous in their support of the disgraceful "doorstepping" of Brenda Leyland which ended as we know with such tragic results. Such was the non existent sympathy, it bordered on celebration.
